Secureye is a world leader in design, development and manufacturer of video security systems and supporting equipments. Secureye produces a complete product range of Analogue & IP Camera, Accessories, Digital Video Recorder, Biometric Time Attendance, Access Control, Virtual Central Locking System & Central Monitoring System.

Secureye constantly strives to maintain its position as the most reliable manufacturer in the industry. Secureye attributes its great success and robust growth to the company's ability to provide courteous, on-time service and dependable products.

From its impressive manufacturing facility located in Shenzhen and through a responsive global network of sales representatives, Secureye continues to offer new technologies, products and services that constantly confirm the company's position as the security industry's premier video security systems and equipment manufacturer. Our product lines include all major CCTV video surveillance products including CCTV camera, SDVR, DVR Card, IP based Solution, Biometric Time Attendance, Access Control, Smart Home System, Sensor, Central Monitoring System & Accessories.

Home automation is the residential extension of building automation. It is automation of the home, housework or household activity. Home automation may include centralized control of lighting, HVAC (heating, ventilation and air conditioning), appliances, security locks of gates and doors and other systems, to provide improved convenience, comfort, energy efficiency and security. Home automation for the elderly and disabled can provide increased quality of life for persons who might otherwise require caregivers or institutional care.

The popularity of home automation has been increasing greatly in recent years due to much higher affordability and simplicity through smart phone and tablet connectivity. The concept of the "Internet of Things" has tied in closely with the popularization of home automation.

A home automation system integrates electrical devices in a house with each other. The techniques employed in home automation include those in building automation as well as the control of domestic activities, such as home entertainment systems, houseplant and yard watering, pet feeding, changing the ambiance "scenes" for different events (such as dinners or parties), and the use of domestic robots. Devices may be connected through a computer network to allow control by a personal computer, and may allow remote access from the internet. Through the integration of information technologies with the home environment, systems and appliances are able to communicate in an integrated manner which results in convenience, energy efficiency, and safety benefits.

S-TU1000

Tower Outdoor Station

- 1/3" CCD
- Night Vision Supported
- Support Upto 5 1/2 Flat Indoor Unit
- Stainless Steel Vandalproof
- Keyboard with LED
- Access Control (Optional)
- 4 + 2 Wiring System

Intercom Management System

S-GU2000
Guard Unit

- 4" TFT Screen
- Power Input: DC 12V ~ 15V
- Master: Network System
- Data transmission rate: 2400bps
- Wiring: 6 shield lines
- Check the alarm record in any time
- Directional call and intercom with door station
- Adjustable ringing volume
- Communication with Main Door Station & Door Releasing Facility

Multi Apartment System - Accessories

Be secured with convenient features and decent design

- A highly functional and advanced Multi Apartment System provides safety for residents.
- Multi Apartment System enables residents to view and talk with visitors and open the door allowing visitor access.
- This system provides security convenience for all residents as total security system. Visitors are visually identified by the video monitor at each house. Elegance to use design makes it the right choice for multiple household buildings.

S-PS12

12V Power Supply for Indoor Unit

- 12V Power Supply
- Output over-voltage protection
- Over-current protection
- Short circuit protection
- Surge protected outputs
- Input 100–240VAC 50/60 Hz

S-PS18

18V Power Supply for Tower Unit

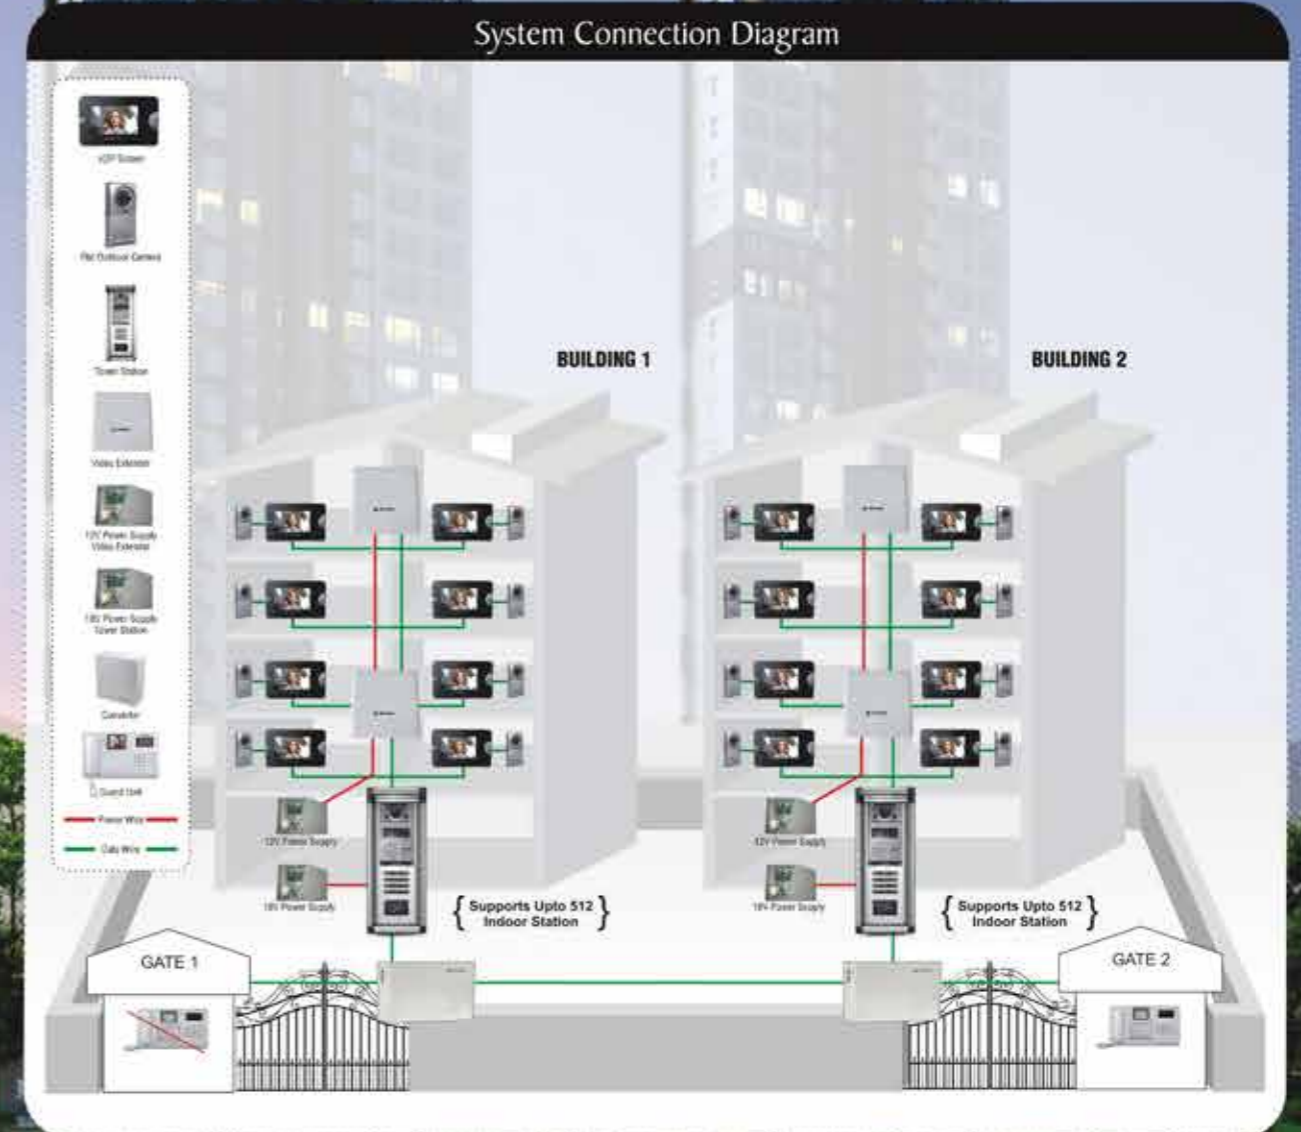

- 18V Power Supply
- Output over-voltage protection
- Over-current protection
- Short circuit protection
- Surge protected outputs
- Input 100–240VAC 50/60 Hz

S-VE4

VDP Extender for Multi Apartment

- 4+2 Wiring System
- Capable to connect 4 Indoor Station
- 12V Power Supply
- Capable to Provides Digital ID to Each Indoor Station

Press the door bell and the call will also ring on your mobile or tablet and you can do the video chatting through remote location.

With a press of a button of your mobile or tablet you can open the door of your home.

- Remote unlocking
- Call any other indoor unit in LAN system
- Call elevator function
- Divert call to Guard center
- Home Automation function
- Support voice, pictures, message checking function
- Accept service from center unit
- Max 4 indoor units work together

Camera

- 1/4" Color CCD camera with IR LED
- Connect to IP monitor with just a CAT5
- IC/ID card access

IP Villa Intercom Outdoor Station

System Introduction

The IP is an intelligent video intercom & home automatic system which is based on TCP/IP technology. It's powerful in intercoms and convenient in installation. Unlimited number of indoor monitors and outdoor stations. Unlimited number of indoor monitors and outdoor stations make the system flexible and expandable. All video, audio and data are simply transmitted by just a CAT-5 cable, therefore, there is no need to handle with those complicated wiring and numerous relays, decoders, adapters, etc.

S-IP50
Front door station

S-IP60
Front door station

Features:

- Luxury Alloy panel
- 1/4" CCD camera
- Suitable for single house or building network system
- Call, intercom, monitor, unlock functions
- Weather-proof & Vandal-proof design
- Infrared LED light compensation

S-TW1000
IP Multi Apartment System

Features:

- 4" TFT-LCD screen with operation menu
- Digital video / audio coding, multi-channels
- Call directly to guard station and door phones
- Password unlock
- ICID card unlock
- photo snapshot (optional function)
- Vandal proof design
- Lift control (optional)
- Languages exchange (Chinese, English)
- Picture snap function (optional)
- Intimidated unlock alarm function
- Door contact alarm function
- CCD infrared night vision compensation
- TCP/IP protocol with network function, support remote upgrade

IP Villa Intercom Indoor Station

S-4LCD
4.3" TFT - LCD Intercom System

10" TFT - LCD Intercom System

Features:

- TFT-LCD digital touch screen, can monitor entrance, outdoor situation anytime and work with a door camera for a second calling
- Remote unlocking
- Directly call can talk with center unit, and send alarm information
- Call any other indoor unit in LAN system
- Download chord ring tones from management center PC and setup mute status
- Call elevator
- Call divert to guard center
- Household appliance control
- Support voice, pictures, message checking function
- Accept service from center unit
- Max 4 indoor units work together
- Support remote upgrading function

Guard Station

IP Video Intercom System

Features

- Connected with just one CAT-5 Cable
- Luxury metal-rimmed appearance
- 5.6" LCD screen
- Work with unlimited gate stations
- Communicate with tenants and visitors
- Receive alarms/calls from apartments and gate stations

Technical Specification

Voltage Input	+DC15V – +DC18V/1A
Standby Current	≤500mA
Conversation Time	1.20s max
Power Output	≥50mW
Maximum Capacity	9999 Gate Stations
Network Connector	RJ45
Network Transmission	TCP/IP
CPU	32 digital
Humidity	45% – 95%
Operating Temperature	-20°C – +55°C
LCD	5.6"

S-IP5000GU
5.6" LCD screen
Guard Station, Luxury Metal - Rimmed Appearance

Connection Diagram

Network Phone Camera

Make Phone Call from Camera

Network Phone Camera is the latest innovation in security technology. This camera helps in doing the video conferencing through your mobile phone. Network phone camera required a WiFi Hot Spot on the camera side where as on the mobile side you can have WiFi or 3G connection, to communicate. All the calls are made free of cost. More over network phone camera can also communicate with another network phone camera through a WiFi connection without any call charge.

Talk to your friends from any where

in the **WORLD**

Works on **Wifi** & **3G**

Features:

- Network Video Call
- IP Camera
- Alarm
- Recorder
- Remote View
- SMS/E-Mail Alerts
- Cloud Update
